

OUR STANDARD FEATURES

Exceed Industry Standards

When you consider the lower tare weight and greater payload of the GRW Refrigerated Trailer, together with the superior materials and construction methods being used, it is easy to see why it is considered the best Reefer Trailer available in Southern Africa.

STANDARD FEATURES THAT EXCEED INDUSTRY STANDARD INCLUDES:

High pressure Polyurethane foam injected panels – no voids, no cavities, no delamination, superior insulation, period.

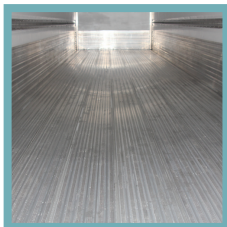

Heavy duty Furgocar stainless steel lock rods and hinges.

Integrated structural framework out of extruded aluminium, ensuring superior strength and durability.

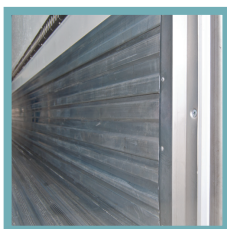

Hot-dipped galvanized substructure to ensure best possible protection against corrosion.

Fully welded, heavy duty, extruded aluminium floor (rated to 9 tons.)

Hot-dipped galvanized steel support frame for the refrigeration unit, with embedded support rails in the roof for a rear evaporator.

600mm High, all round, heavy duty, extruded aluminium internal scuff protection, fully welded to the floor, with no exposed fasteners.

Patented wiring harness and connectors with epoxy sealed LED type lights for durability and ease of maintenance.

Super strong (6mm box sections) stainless steel rear frame with specially moulded polyurethane impact rubbers for enhanced protection.

Two recessed stainless steel cargo rails per side with four heavy-duty, galvanized shoring poles are fitted.
